

~~PLANON~~

Accelerator™ 

**EMPOWERS YOUR BUSINESS
SHORTENS TIME-TO-VALUE
DELIVERS PROVEN STANDARDS**

→ A fast, simple enterprise software solution that follows a predictable process and incorporates the best practices of over 1,300 implementations.

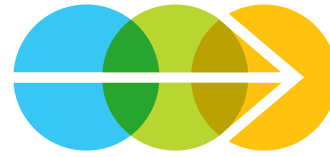

OUT-OF-THE-
BOX SOLUTION

In today's business environment, organizations increasingly expect clear, articulated business benefits, short time-to-value and excellent ROI when making a significant investment in software. Effort and risk need to be reduced and business continuity needs to be guaranteed.

With real estate and facility management investments easily exceeding 30% of annual spending, organizations are looking for software solutions that reduce operating expenses, prolong the lifespan of expensive assets and align long-term investments with organizational goals and strategy.

Planon has taken 25 years of experience and more than 1,300 implementations and consolidated this valuable experience into a new preconfigured and ready-to-use solution, Planon Accelerator™.

Planon Accelerator™ is the most secure, cost efficient and quickest way to implement Planon solutions. The out-of-the-box solution delivers standard and integrated business processes in: Real Estate, Space and Workplace Management, Maintenance Management and Integrated Services Management.

ACCELERATE YOUR BUSINESS PROCESS →

Preconfigured processes promise immediate return on investment.

Planon Accelerator™ is more than another best practices solution. By providing preconfigured processes, including workflows, catalogues, reports, dashboards, templates, roles, authorizations, data import facilities and configuration descriptions, it provides the tools to run operations efficiently and effectively. And the benefits are immediate.

By taking advantage of these standard processes and adapting when necessary, organizations significantly reduce implementation time, costs and effort while setting a solid foundation for future growth.

Empowers your business

Operations related to your facility management and real estate need to support and drive productivity in your core business.

Planon Accelerator™ provides the process automation that empowers your business. Workflow-based automation of processes enables people to work more effectively and plays a key role in helping your organization achieve the next level of maturity.

Shortens time-to-value

In traditional software implementation projects the majority of resources are spent on software customization. This puts undue pressure on training, acceptance and change management, significantly influencing the success or failure of the project.

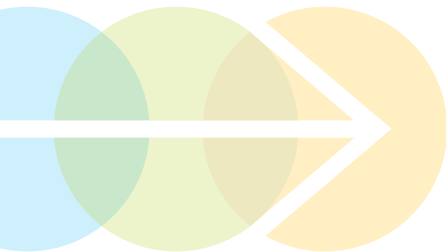

Planon Accelerator™ reduces the time and effort spent in design and implementation by offering true out-of-the-box business processes based on the best practices gained from experience working with the world's leading organizations. This shortens time-to-value and frees up time and resources to focus on change management and acceptance.

Delivers proven standards

Business processes are becoming more standardized, with organizations including IFMA, CoreNet, CEN, OSCRE, LEED, Breeam, Euro-FM, BIFM, Gefma, FMN, ITIL driving this development.

This increased standardization enables improved benchmarking, supply and demand chain integration, and the use of a common language.

Planon Accelerator™ closes the gap between new valuable standards and your current daily practices by integrating them to all relevant processes available in the solution.

Expected Process

Actual Process

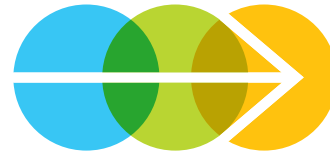

With Planon Accelerator™

- Initiation
- Overall Design
- Process Design and Configuration
- Training and Change Management

Planon Accelerator™ reduces the time and effort required in design and implementation, freeing up time and resources for change management and acceptance.

Planon Accelerator™ is based on more than 1,300 successful implementations worldwide in all types of organizations and is the first and only truly integrated out-of-the-box IWMS (CAFM) solution.

EMPOWERS YOUR BUSINESS → SHORTENS TIME-TO-VALUE →
DELIVERS PROVEN STANDARDS

Provides all organizations with a faster, easier, cost-effective implementation.

YOUR ADDITIONAL BENEFITS FROM PLANON ACCELERATOR™

In addition to improved process automation, faster time-to-value and the adoption of proven market standards, Planon Accelerator also delivers these key benefits:

Simplified implementation

Planon Accelerator™ allows you to adopt business processes immediately without extensive design and configuration effort. You simply switch them 'on' and begin to use all preconfigured workflows, standards and reports. Automated data-upload tools support a fast initial data load and make sure that you can re-use existing data, significantly reducing implementation effort and costs.

Integrated processes

Whether it is for Real Estate, Space Management, Maintenance Management or Service Management, all related processes are interconnected and integrated, driving more value from your Planon implementation and facilitating cross-discipline reporting.

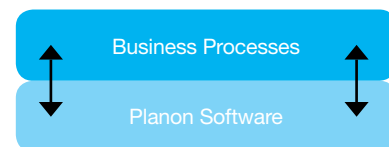

Agility and scalability

With Planon Accelerator you focus on what you need; nothing more and nothing less. However, as the environment of business changes rapidly, agility and scalability are extremely important. Having the flexibility to switch additional business processes 'on' very easily or even change existing processes in line with changing requirements ensures continued alignment with your evolving organization.

PLANON STANDARD SOFTWARE AND PLANON ACCELERATOR™

Planon Accelerator™ is based on and includes the standard software suite available in Release 2011.

PLANON ACCELERATOR™

Planon Accelerator™ contains (*) per business process:

- Preconfigured workflows
- Relevant functions and tasks
- Predefined screens with applicable fields
- Predefined alerts and notifications
- Reports and dashboards
- Report templates
- Applicable Self-Service forms
- Default integration-links with other processes
- Data catalogues
- Data import tools
- Roles and authorizations
- Applicable business rules and extensions
- Configuration documentation
- Planon standard software

(*) content differs per business process.

CAN YOUR ORGANIZATION TAKE ADVANTAGE OF PLANON ACCELERATOR™?

Planon Accelerator™ is available in all market segments for organizations of any size. Planon Accelerator™ provides all organizations with a faster, easier and less expensive implementation.
